EXPERIENCE

Zoho Corporation
June. 2023 – Present

Member Technical Staff
Chennai

- **Optimized Learning Plan module**, cutting data fetch times from nearly **2 minutes to under 300 ms**, resulting in a approximate **90% improvement in response times** and significantly enhancing user experience across multiple large-scale customer deployments.
- **Created a custom video player wrapper** with advanced controls like restricted seeking and autoplay, improving learning compliance and engagement for **1000+ end users** on client LMS portals.
- **Built modular Java and JavaScript frameworks** adopted by various **cross-functional teams**, streamlining the delivery of new features and maintaining consistent design standards across the platform.
- **Enhanced database and API efficiency**, tuning SQL queries and integration flows to support **high-volume user activity**, improving overall platform scalability and reliability for diverse **enterprise customers**.

Zoho Corporation
Aug. 2022 - May. 2023

Project Trainee
Chennai

- Implemented **Applicable To** feature enabling customers to define course eligibility by user, department, designation, or group etc addressing **many critical client needs** and enhancing targeted learning for **1000+ employees across enterprise deployments**.
- Identified and fixed **60+ functional and security bugs** contributing to a smoother product experience and enhanced security

Zoho Corporation
May. 2022 – Jun. 2022

Software Engineering Intern
Chennai

- **Simulated a full-stack Learning Management System** with role-based authentication for admins, learners, and trainers, supporting core features like **course creation, content delivery, and enrollments** built using **React, Java, MySQL and proprietary company frameworks**, handling end-to-end learning workflows for **dozens of simulated users**.

PROJECTS

Food Ordering Application

- **Built a React food app** with dynamic menu, cart, and checkout
- **Created a Node.js backend** using text files for simple data storage and orders.

Expense Splitter Web App

- **Developed a full-stack Java app** with MySQL to split expenses and track balances across users and groups.
- **Built a responsive frontend** with HTML, CSS, and JavaScript, dynamically updating debts and summaries.

EDUCATION

Sri Venkateswara College of Engineering
Jul. 2019 – June 2023

B.Tech., Information Technology
Chennai

- **Coursework**: Data Structures, Algorithms, Databases, Computer Systems, Machine Learning, OOPS
- **Research**: Built a **hand gesture recognition system** using **machine learning**, applying image processing and classification to enable **touchless control**, tested on dozens of samples.

SKILLS

Languages : Java, C++, MySQL, JavaScript, React.js, Python, HTML/CSS, Node.js
